Welcome to **EMEA SECURITY**

CONFERENCE & EXHIBITION

31st May-1st June

**Hilton Mall of Istanbul
Istanbul, Türkiye**

**HIGH SECURITY PRINTING, ANTI-COUNTERFEITING
BRAND PROTECTION**

Illicit Trade & Counterfeiting is a serious and growing threat to society. Through smuggling, counterfeit and tax evasion, governments are losing billions in tax revenues, legitimate businesses are being undermined, and consumers are being exposed to poorly made and unregulated products.

EMEA Security Conference & Exhibition brings together brand owners, regulators, law enforcement, government policy-makers and security solution providers to discuss the industry challenges regarding Anti-Counterfeiting, Online Brand Protection, Cross-Border Product Security, Product Smuggling and Illicit Trade Threats towards governments, brands and communities.

For the first time, **EMEA Security Conference & Exhibition | High Security Printing, Anti-Counterfeiting & Brand Protection** will be hosted in Istanbul, Türkiye, under the theme of **“Combating Illicit Trade & Counterfeiting in EMEA Region”**, where we will bring together an international audience of over 150 leading specialists to examine the latest trends, developments, risks and solutions to illicit trade and counterfeiting activities across many industries.

Our events offer you the chance to discuss winning strategies, successful examples and innovative new technologies, with a special emphasis on the EMEA region. Through our live, interactive Panel Discussions, Case Studies & Presentations, you would reap the benefits of learning new information materials and make profound connections via our vibrant Networking Sessions and Exhibitions.

We look forward to see you share your expertise and network with various industry experts, colleagues and friends from around the globe. Welcome!

OUR PARTNERS

SUPPORTING PARTNER

React is a not-for-profit organization with over 30 years experience in fighting counterfeit trade. One of our main objectives is to keep the costs of anti counterfeiting actions affordable.

React is the most cost effective, efficient and practical anti counterfeiting service, able to respond with agility and flexibility to the needs of its Member companies worldwide. It will continue to act as a centre of excellence and provide a 'one-stop shop' for practical enforcement and innovative ideas in dealing with legal, environmental, disposal and recycling issues arising from intellectual property rights violations.

PLATINUM PARTNER

Laava is the developer of the Laava Smart Fingerprint® – the world's first secure, smartphone scannable and globally scalable alternative to QR codes. Laava provides class-leading digital authentication and consumer engagement solutions for products, documents and digital assets across the world.

Laava's distinctive and revolutionary Smart Fingerprint technology helps protect brands and consumers against the risk of counterfeits, fraudulent activity and diversion - while simultaneously building consumer engagement, brand value and revenue through immersive digital experiences.

GOLD PARTNER

ApiraSol helps brand owners and enforcement authorities to map and disrupt illicit trade.

ApiraSol Supply Chain Suite combines shipments and open-source intelligence, uncovering illicit supply chains, from producers to importers, distributors and retailers.

GOLD PARTNER

In our experience, a sustainable brand protection programme must convince in the three dimensions of security, effectiveness and scalability. Only by fulfilling these three dimensions the customer receives true value: Counterfeits are driven out of the market and trust in the brand is strengthened. As a market-leading provider of brand protection solutions, we continuously evaluate our solutions along these three dimensions and try to strengthen them through technological innovation. This is how we push the boundaries of what is possible in the field of brand and counterfeit protection every day.

SECURE. EFFECTIVE. SCALABLE.

SILVER PARTNER

ANY Security Printing Company PLC was founded in 1851. ANY is currently the biggest security printing company and identity solution provider in Hungary, and is present in more than 60 countries. The Company's shares have been listed on the Budapest Stock Exchange in the premium category since 2005. With more than 1000 employees in 4 countries and 9 premises, its goal is to serve its Partners to the highest standards through continuous innovation and development. The Company helps state administration in secure person and innovative product identification projects from designing the concept to implementation. Its international qualifications and certificates assure the highest security in the field of card and document production and personalisation.

The specialists of the Document Security Laboratory of ANY have developed numerous complex, effective protective solutions and technologies, including document printers, security inks, paper additives and special control devices.

SILVER PARTNER

VerifyMe offers a range of brand protection technologies to authenticate products and packaging reducing product counterfeiting and diversion. These solutions can also be used to better engage your customers, saving money and increasing sales.

Brand Protection & Consumer Engagement experts
AUTHENTICATE - TRACK - ENGAGE

Bringing together 360° brand protection technologies to tailor anti-counterfeiting and diversion solutions to your and your clients' unique needs

SILVER PARTNER

Authentic is a cutting-edge solution that optimizes the creation, issuance, management, and verification of certificates and important documents for government and certificate issuing organizations.

By leveraging the power of blockchain technology, Authentic ensures the irrefutable integrity of digital certificates while enabling seamless verification.

With Authentic, organizations can confidently entrust their valuable certificates and documents to our secure and reliable solution.

EXHIBITOR PARTNER

Since its inception in 1998, Stardust has been developing and commercializing state-of-the-art covert, luminescent technology for Currency/ Document Authentication, Supply Chain Traceability, and Brand/Liability Protection.

It was founded by Drs. Edward and Vitaly Talyansky, father and son, both physicists with a focus on materials science. A lion share of its revenues and efforts is spent on constant innovation and expansion of its portfolio of taggants and detection instruments.

Stardust provides brand owners and government agencies with the ability to authenticate their products and materials at any point in the supply chain, from the production site to post-installation or return. Stardust is a major player in currency and tax stamp markets.

Laava Smart Fingerprints® - The Global Mark of Trust™

The world's first digitally verifiable,
globally scalable alternative to QR codes.

Transform your products into secure connected products.
Enable consumers to authenticate and engage at point of purchase and beyond.

Secure by design, unique to every individual item, and built for consumer engagement.

Utilise conventional digital printing technology. No special inks or labels required.

Consumers can scan, verify and engage - with any phone - to unlock unique brand stories, rewards, competitions and more.

The secure gateway to trusted experiences for products, documents, assets, NFTs and platforms. Can be white labelled.

Invisible anti-copy security layer over the Smart Fingerprint that can be scanned with a smartphone. Added security plus all the benefits of Laava's consumer engagement and data analytics features. Can also be used as a standalone security layer over a brand logo.

Combine three key capabilities into a single,
low-cost trust mark, unique to each product.

Brand Protection

Inspire consumer confidence in product authenticity, channel integrity and core claims.

Provenance and Traceability

Easily access 2-way integration with ERP, traceability, DLT, NFT and e-commerce platforms.

Storytelling and Engagement

Offer secure, exclusive, rich engagement opportunities, like digital storytelling, rewards and more.

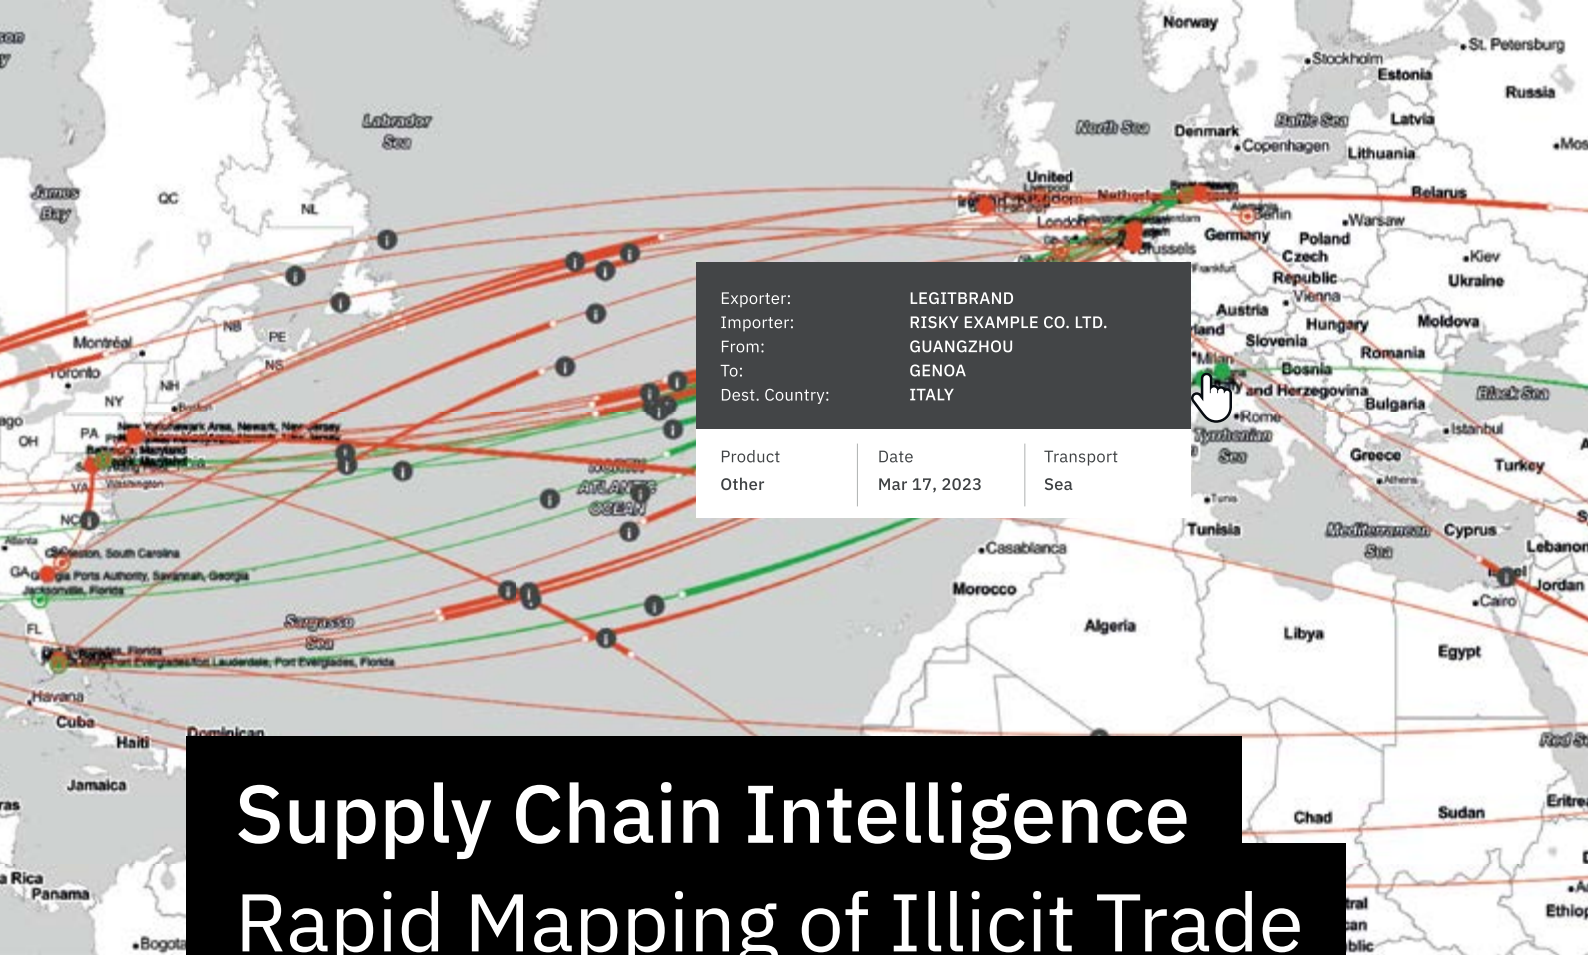

Laava are proudly exhibiting at the EMEA Security Conference.

Innovative solutions for an effective brand protection concept

We develop and manufacture innovative, secure product markings, which can be combined with our cutting-edge digital platform. These effective brand protection solutions enable brand owners all over the world to combat counterfeiting, grey market trading and unauthorized overproduction. Moreover, they open avenues for customer interaction, track & trace and market analysis.

Authenticate. Track. Engage.

Protect your brand. Grow your business.

VerifyMe offers a true, all-in-one solution for brand protection and consumer engagement.

VerifyMe Authenticate™

- Protect your brand with visible and invisible authentication that ensures consumer safety and improves customer experience
- Provides invaluable data on the interaction between your brand and your consumers to build loyalty and maintain competitive advantage

VerifyMe Engage™

- Create powerful brand engagement opportunities with VerifyMe cloud-based authentication software combined with mobile web experiences.
- Instantly offer branded merchandise, coupons, opt-in loyalty rewards, and more

VerifyMe Track & Trace™

- Gain complete supply chain insight to know what's happening from point of manufacture to point of sale
- Obtain robust business intelligence while proving authenticity and compliance for greater customer confidence

VerifyMe Online™

- Track and monitor over 1,000 marketplaces daily, including social media markets
- Pinpoint IP violations as analysts identify manufacturers and distributors of fake goods

Product Authentication and Customer Engagement Experts

VerifyMe draws from a full spectrum of world-class authentication, track and trace, and communication technologies to create integrated solutions for your unique requirements. All designed to keep your brand, your customers, and your reputation safe.

ABOUT US

In today's world of rapid scientific and technological progress, security solution providers need the very best materials to make their products secure. Luminochem has a team of highly qualified researchers to develop top quality luminescent materials for different applications such as security printing, brand protection, coatings, fibers etc.

Luminochem is a fully integrated, highly innovative manufacturer of UV- and IR-active security pigments, dyes, dispersions and complex solutions with its own, state-of-the-art research and development department, inhouse production and world-wide sales.

The company was founded in 2008 by a group of chemical engineers with a wide range of international experience in R&D projects and industrial chemical synthesis. It specialises in developing and manufacturing unique luminescent photoactive materials and markers, with the focus on organic UVfluorescent security pigments and dyes, near infra-red absorbing materials and anti-Stokes (up-converter) pigments. In 2021 a renowned financial investor acquired majority ownership in the company providing necessary capital for our ambitious growth plans.

MAIN BENEFITS

- 1. Technologically advanced, functionally leading, visually fascinating materials
- 2. High performance and speciality chemicals
- 3. Grinding mills designed to manufacture fine particle sized pigments

PRODUCTS FOR HIGH SECURITY AND BRAND PROTECTION

Our main product line for high security purposes includes innovative organic speciality and effect pigments, dyes and aqueous dispersions with unique, radiant emission colors. Most of our products are virtually invisible during normal daylight but become stunningly bright on exposure to different UV light (UV-A, UV-B, UVC). We also offer NIR absorbing and upconverting materials.

Our brand protection solutions include covert product and label marking for invisible protection and seamless product design, quality assurance and product sorting solutions with invisible serialization, unique chemical markers for higher security, security taggants, and the combinations of all of the above.

A series of conferences & exhibitions

ELIMINATING Illicit Trade & Counterfeits

**YEAR
2024**

Illicit Trade and Counterfeit Goods is a growing threat worldwide. From trafficking, counterfeiting and tax evasion, to illegal possession of goods, services, smuggled humans and wildlife, illicit trade affects many sectors across the board - such as, governments losing billions in tax revenues; legitimate businesses are undermined; and consumers are exposed to poorly-made and unregulated products. The trade of contraband products is becoming a common practice worldwide due to its profitability for criminals; consumers' lack of awareness on threats associated with fraudulent purchases; lack of rigorous enforcement by the authorities; and the scarcity of legal actions undertaken by brand owners to curb the problem.

AsiaS Security Group's Conferences & Exhibitions offers opportunities for brand owners, regulators, law enforcement and government policy-makers to come together and discuss current predicaments, winning strategies and innovative new technologies. Through our Conference & Exhibition series, we provide you an international platform to address industry challenges for Anti-Counterfeiting, Online Brand Protection, Cross- Border Product Security, Product Smuggling and Illicit Trade Threats.

OUR MISSION

COMBATING THE GLOBAL THREAT OF ILLICIT TRADE AND COUNTERFEIT GOODS

With the global trade in fake goods worth some half a trillion US dollars a year, IP crime touches all industry sectors, affecting the global economy and endangering public health. From smuggling, counterfeiting and tax evasion, to the illegal sale or possession of goods, services, trafficked humans and wildlife, illicit trade is compromising the attainment of economic and social development goals in significant ways - such as crowding out legitimate economic activities; depriving governments of revenues for investment in vital public services; dislocating millions of legitimate jobs; and causing irreversible damage to ecosystems and human lives. Collaboration is key to combating Illicit Trade. Therefore, our aim in organizing conferences is to provide an open-dialogue platform that enhances cooperation and share the best practices available between parties in the public and private sectors to achieve our co-shared goal to combat Illicit Trade.
